

Part 1 – Creation of new Workspace and Project

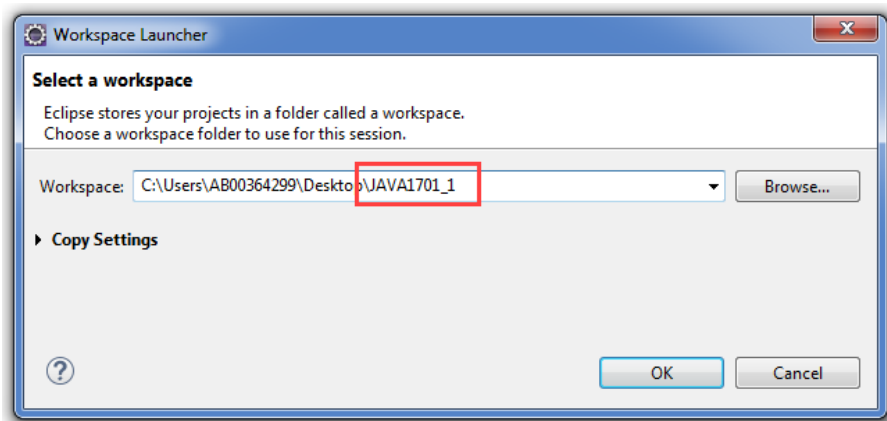

Launch Eclipse

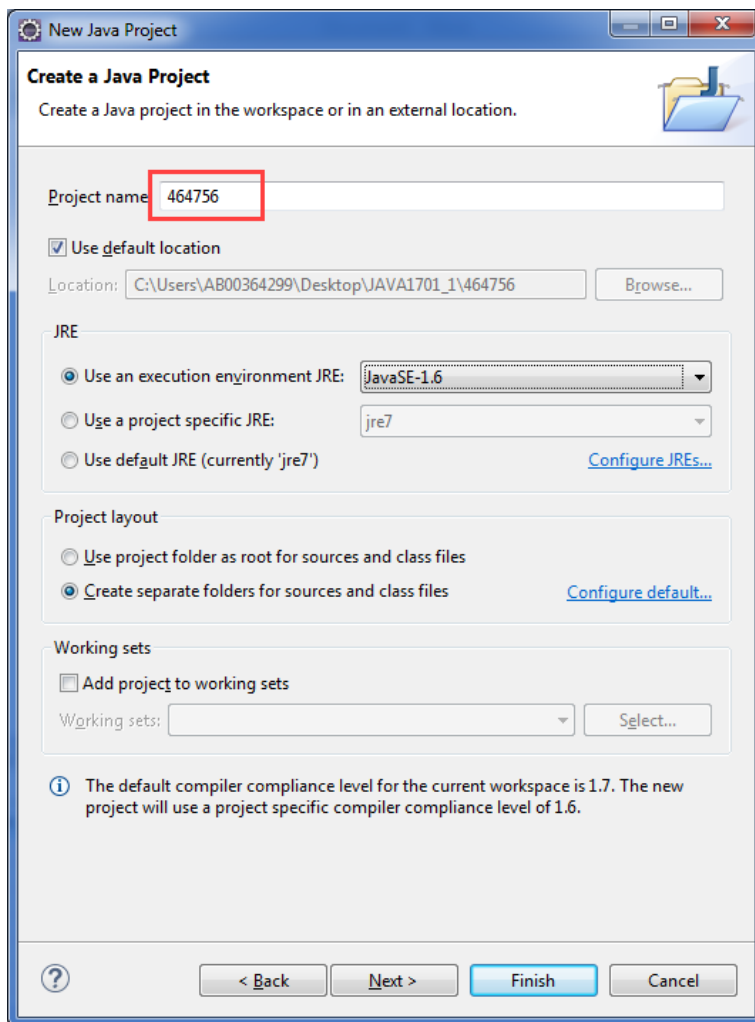

Create a new workspace in Eclipse

Give the name to the workspace same as the “folder” name on the question paper

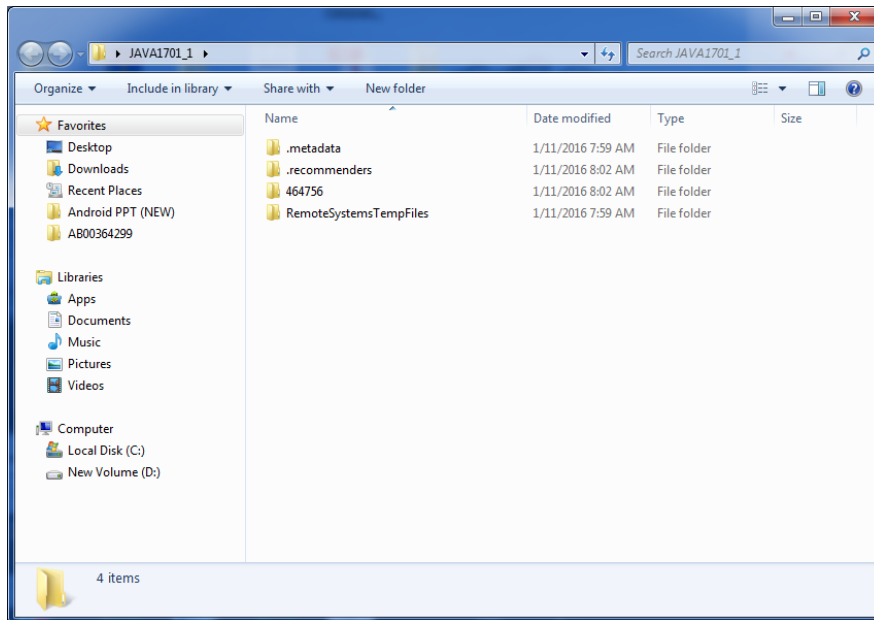

Create a new Eclipse project. Give the name same as Employee ID

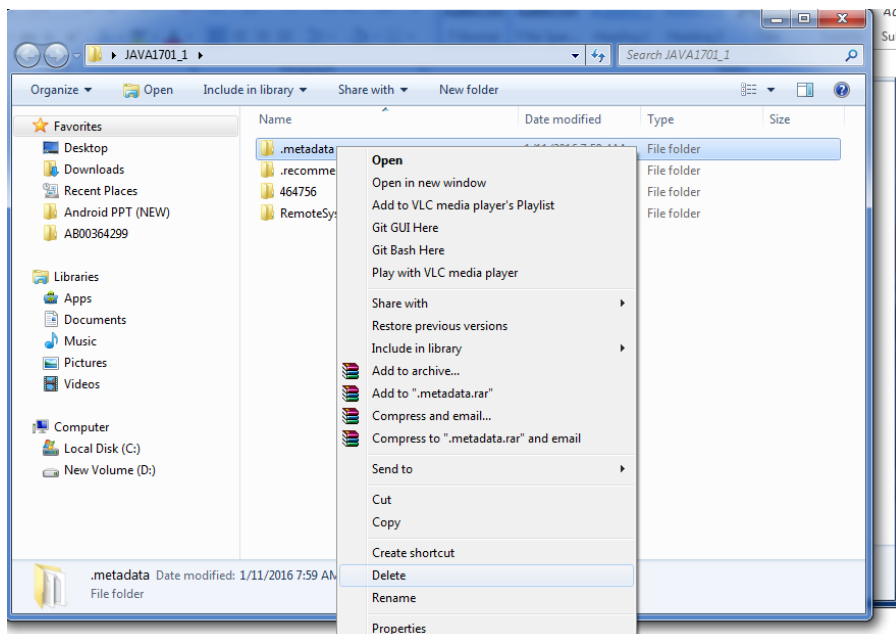

Part 2 – Uploading the project to ftp

Close Eclipse IDE before starting with the uploading process.

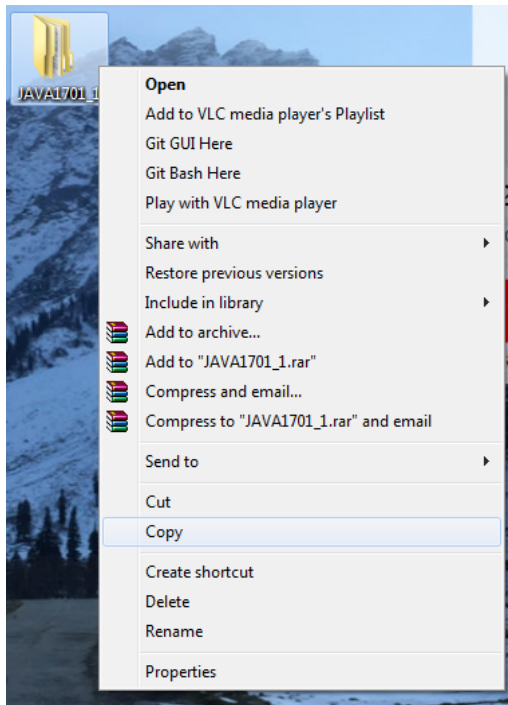

Locate and open the workspace folder on Desktop

Select and delete the .metadata folder

Select the workspace on desktop and copy it

Open [ftp 10.10.16.178](ftp://10.10.16.178)

Go to the Batch Exam folder and paste the workspace folder there.
